CONTENTS

General Sessions

	Page
A Research Opportunity—*J. E. Coke, President*	11
Old Timers—*Fred G. Taylor*	14
Sugar-Beet By-Products and Their Place in Idaho Agriculture—*E. J. Iddings*	16
Virus Diseases of Sugar Beets—*C. W. Bennett*	23
Methods of Measuring Soil Moisture—*N. E. Edlefsen, A. B. C. Anderson,* and *W. B. Marcum*	26
Practical Control of Date of Irrigation by Means of Soil-Moisture Blocks—*H. W. Dahlberg* and *Asa C. Maxson*	37
Studies of Moisture Requirements of Sugar Beets—*S. B. Nuckols*	41
Some Soil-Moisture Conditions in Relation to Growth and Nutrition of the Sugar-Beet Plant—*L. D. Doneen*	54
Sugar-Beet Growth and Soil-Moisture Study—*W. B. Marcum, Geo. L. Barry,* and *G. D. Manuel*	63
Irrigation of Sugar Beets Grown for Seed in Hemet Valley, California—*Charles Price* and *M. R. Huberty*	65
The Relationship of Nitrogen to the Formation of Sugar in Sugar Beets—*Albert Ulrich*	66
Mineral Assimilation of Sugar Beets—*W. E. Carlson*	81
Plant-Food Elements in Sugar Beets Throughout the Growing Season—*H. D. Brown* and *H. Irving*	89
Phosphorus and Nitrogen Deficiency Symptoms in Sugar Beets—*Jesse Green*	101
Soil Deficiencies as Related to Sugar-Beet Seed Production in the Willamette Valley, Oregon—*Golden L. Stoker*	103
A Study with Sugar Beets on Two Fertility Levels of Soil, Rocky Ford, Colorado—Years 1938-40, inclusive—*A. W. Skuderna* and *C. W. Doxtator*	112
Fertilizers—Manner of Application—*J. E. Jensen*	119
Use of Manures for Sugar Beets—*S. B. Nuckols*	121
Resume of Commercial Fertilizer Studies with Sugar Beets—*A. W. Skuderna*	138

CONTENTS—*Continued*

Increasing Sugar-Beet Yields Through Early Planting—*A. W. Skuderna* 147

Steer and Lamb-Feeding Trials with Various Forms of Sugar-Beet Pulp—*W. M. Herms, R. E. Miller, H. R. Guilbert,* and *R. D. Jones* 150

Beet-Sugar Production as Influenced by Climate—*Albert Ulrich, Wm. R. Lider,* and *H. J. Venning, Jr.* 160

Multiple versus Single-Factor Experiments—*Bion Tolman* 170

Comparative Efficiency of Lattice and Random-Block Designs for a Sugar-Beet Variety Test—*G. W. Deming* and *O. H. Coleman* 181

Pre-Harvest Estimate of Yield and Sugar Percentage Based on Random-Sampling Technique—*H. E. Brewbaker* and *H. L. Bush* 184

Relative Yields of Reduced Stands of Sugar Beets Planted at a Normal Date and of Replanted Sugar Beets—*G. W. Deming* 197

How Cooperative Activities of Sugar Companies, Agricultural College, and Beet Growers Function in the Farmers and Manufacturers Beet-Sugar Association—*M. J. Buschlen* 203

A Study of Sugar-Beet Growth—Years 1921 to 1928 and 1938 to 1941, inclusive—*A. W. Skuderna* and *C. W. Doxtator* 208

Seed-Segmenting Devices—*Roy Bainer* 216

Seed Treatment of Segmented Seed—*L. D. Leach* and *Roy Bainer* 220

Single-Seed Planting of Sugar Beets—*S. W. McBirney* 228

Mechanical Thinning of Sugar Beets—*E. M. Mervine* 237

Trends in Sugar-Beet Field Machinery Development—*H. B. Walker* 242

A Mechanical Topper—*J. B. Powers* 252

A Mechanical Beet Digger—*V. N. Tramontini* 255

Costs on Harvesting Beets with a Manual Sorting Lifter Machine—*Austin Armer* 260

CONTENTS—*Continued*

Recent Improvements in Sugar-Beet Seed Harvesting and Threshing Equipment—*A. A. Mast, R. C. Wood,* and *I. M. McDonald* 263

Mechanical Cross Blocking—*Ford Scalley* 268

Beet Population Secured with Single Seeding and Cross Blocking—*H. J. Venning, Jr., R. S. Lambdin,* and *Wm. R. Lider* 275

Cross Cultivation of Sugar Beets—*R. J. Tingley* 278

Methods and Equipment for Fertilizing Row Crops—*R. A. Jones* 283

Colchicine Treatments of Sugar Beets and the Yielding Capacity of the Resulting Polyploids—*F. H. Peto* and *K. W. Hill* 287

Colchicine-Induced Tetraploidy in Sugar Beets: Morphological Effects Shown in Progenies of a Number of Selections—*Ernst Artschwager* 296

Polyploidy in Sugar Beets Induced by the Use of Colchicine, Ethyl Mercury Phosphate, and Other Chemicals—*Frank F. Lynes* and *C. D. Harris* 304

Evaluation of Polyploid Strains Derived from Curly-Top Resistant and Leafspot-Resistant Sugar-Beet Varieties—*F. A. Abegg* 309

Use of Colchicine in Nutrient Solution with Sugar Beets—*A. W. Skuderna* 321

Non-Sugar Relationships in Breeding High-Purity Beets—*H. W. Dahlberg* 322

Some Crossing Experiments with Sugar Beets—*C. W. Doxtator* and *A. W. Skuderna* 325

Use of Red Garden Beet in Sugar-Beet Top Crosses—*G. W. Deming* 336

Generation Studies of Sugar-Beet Varieties—*H. E. Brewbaker* and *H. L. Bush* 342

A Study of Varietal Adaptation with Sugar Beets—1937 to 1941, inclusive—*A. W. Skuderna, C. W. Doxtator, Edward Swift, R. L. Bowman,* and *Arthur Deschamps* 349

CONTENTS—*Continued*

Report on 1941 Tests of U. S. 200 x 215, U. S. 215 x 216, and Other Varieties Arising in Leafspot-Resistance Breeding Investigations of the U. S. Department of Agriculture—*G. H. Coons, Dewey Stewart, J. O. Culbertson, G. W. Deming, J. O. Gaskill, J. G. Lill,* and *S. B. Nuckols*.... 356

Further Studies in Newer Designs for Large-Scale Variety Tests—*H. L. Bush* 365

Selection of Sugar Beets for Size of Root Under Wide and Normal Spacings—*John O. Gaskill* 372

Comparison of Field Seeding of Sugar Beets and Mangel Wurzels with Two Methods of Transplanting—*John O. Gaskill* 377

Mosaic and Seed Production—*H. E. Brewbaker* 381

Vernalization of Sugar-Beet Seed—*Myron Stout* and *F. V. Owen* 386

Winter Stecklings—*C. E. Cormany* 395

Refinements in the Technique of Isolating by Bags and Cages—*Frank F. Lynes* and *C. E. Cormany* 399

Effect of Sulfur Dust on Germination of Sugar-Beet Pollen—*Ernst Artschwager* 406

The Relation of Phosphorus and Nitrogen Ratio to the Amount of Seedling Diseases of Sugar Beets—*M. M. Afanasiev* and *W. E. Carlson* 407

The Effect of Temperature and Moisture on the Amount of Seedling Diseases of Sugar Beets—*M. M. Afanasiev* 412

The Use of Chloropicrin for Beet-Seed Warehouse Fumigation and Other Purposes—*Frank F. Lynes* 413

Conditions Favoring Phosphate Deficiency in Sugar Beets—*H. E. Morris* 422

A Botrytis form Causing Storage Rot in Sugar Beets—*Albert Isaksson* 423

Dusting and Spraying Sugar Beets in Michigan for Control of *Cercospora* Leafspot—*J. H. Muncie* 430

The Effect of Preceding Crops on the Amount of Seedling Diseases of Sugar Beets—*M. M. Afanasiev, H. E. Morris,* and *W. E. Carlson* 435

CONTENTS—*Continued*

Black Root Diseases of Sugar Beet in 1941—*G. H. Coons, J. E. Kotila,* and *H. W. Bockstahler* 436

Beet Leafhopper Populations in Southern Idaho and Northern Utah during the Seasons of 1940 and 1941—*J. R. Douglass, H. E. Dorst,* and *W. E. Peay* 438

Age of Plants as a Factor in Resistance to Curly Top of Sugar Beets—*N. J. Giddings* 452

Production of Heavy Curly-Top Exposures in Sugar-Beet Breeding Fields—*Albert M. Murphy* 459

A General Appraisal of Plant Cover in Relation to Beet Leafhoppers, Forage Production, and Soil Protection—*R. L. Piemeisel* 462

Beet-Leafhopper Populations on Various Types of Russian-Thistle Stands—*David E. Fox* 465

The Effect of Field Conditions and of Field Practices on the Development of Black Root in Sugar Beets—*M. W. Sergeant* 466

The Beet Leafhopper as a Pest of Beets Grown for Seed—*Van E. Romney* 466

Progress Report on Investigations of Insects Affecting Sugar Beets Grown for Seed in Arizona and New Mexico—*Orin A. Hills* and *Van E. Romney* 468

The Sequence of Infection of a Seedling Stand of Sugar Beets by *Pythium debaryanum* Hesse and *Aphanomyces cochlioides* Drechsler—*W. F. Buchholtz* 470

Chemistry Section

A Photo-Electric Apparatus for Determination of Color and Turbidity in Refined Sugar—*R. J. Smith* 471

Studies in the Industrial Control of Micro-Organisms in Granulated Sugar—*Robert S. Gaddie* and *Willard A. Olson* 475

The Relationship and Significance of Carbonate and Sulfated Ashes and the Approximate Salt Content of Beet Sugars, Sirups, and Molasses—*Charles A. Fort* and *Sam Byall* 489

Seasonal and District Variations in the Rate of Crystallization of Sucrose From Beet-House Sirups—*E. H. Hungerford* 499

CONTENTS—*Continued*

Harmful Constituents of the Beet, Factors Which Influence the Harmful Nitrogen—*Elizabeth Roboz* 515

The Pilot Plant Ammoniation of Dried Sugar-Beet Pulps—*H. C. Millar* 529

The Determination of Sulfates in Sugar-Factory Products Employing the Tetrahydroxyquinone (THQ) Reagent—*A. H. Edwards* 541

Some Regional Effects on Beet-Sugar Quality—*Charles A. Fort* 546

The Measurement of Color and Turbidity in Granulated Beet Sugars—*R. A. McGinnis* and *E. E. Morse* 555

Safety Problems in the Sugar Industry—*Frank M. Sabine*..... 568

The Technique of Soil-Moisture Determination—*P. W. Alston* 576

A Study of the Accumulation of Chlorides and Their Effect on Beet-Sugar Factory Operations—*Heber C. Cutler* and *R. H. Woolley* 577

Does Beet Sugar Follow the Trend in the Demand for the Higher-Quality Sugars?—*Chas. M. French* 582

New Possibilities for Economy in First-Carbonation Filtration—*R. D. Kent* 586

Reports

Report of the Committee on Standardization of Experimental Methods 595

Report of Research Coordinating Committee to the Meeting of the Society of Sugar-Beet Technologists, Salt Lake City, January 6, 1942 600

Report of the Treasurer 605

Report of the Secretary 606
